

RENDITIONDIGITAL

multimedia support solutions

The power of information is felt when it converges with technology. Modern technologies can record, play, display and access information in different formats – what we now call as multimedia.

Today, multimedia technologies can enhance information sharing and application, and even knowledge creation.

RenditionDigital provides multimedia support solutions that cater to your business's information, education, and infotainment needs. Aside from quality, we make sure that you experience maximum benefits from our creative, innovative and unique multimedia support.

Cost-efficient. Creative. Innovative.

COST-EFFICIENT. CREATIVE. INNOVATIVE.

We implement cost-efficient processes to deliver quality solutions.

cost-efficiency is an oath to our clients.

Our cost-efficient project implementation processes ensure that you have direct communication with Project Leaders and concerned staff. We also make sure that you experience maximum benefits from our competitive cost structure, rapid turnaround time, and project management skills. More importantly, we require objective evaluation in all phases of project development to ensure delivery of quality solutions.

highly creative minds are the building blocks of our multimedia products.

Our multimedia specialists are capable of visualizing your concepts translating them into highly creative multimedia outputs to get your message across your target audience.

Flash Engineering

Our multimedia engineers can conceptualize and create complex animations using the latest animation tools. Our menu of Flash engineering services includes:

- Advanced action script programming
- Application design and specification
- Content integration and maintenance
- Creative concept development
- e-Learning interactivities using action script and flash programming
- Flash Comm Server, AJAX (ametric JavaScript and XML) and DHTML
- Flash usability
- Game design and specification
- Interfacing through XML or Flash
- Interfacing with PHP/mysql (AMFPHP), ASP.NET, J2EE and ColdFusion
- Object-oriented flash development
- Problem solving, optimization and simplification
- Site design and specification

We translate your concepts into highly creative multimedia outputs to get your message across.

Graphics and Website Development

Our graphics and website design specialists are knowledgeable in the latest design approaches and are skilled in developing original materials. We offer design and development of graphics and websites.

We offer creation of original designs as well as enhancements to existing websites and multimedia products.

Video and Audio Production

Our multimedia solutions include post-production services of audio and video materials. We also create and package original materials in different audio and video formats.

DTP and Localization

We work with localization clients to provide DTP support and other services which include:

- DTP Layout
- Localization of existing graphics
- Post-scripting and PDF creation
- SGML, HTML XML extractions and conversions

We also develop product editions that cater to customers from different countries.

Languages covered include Bulgarian, Czech, Danish, Dutch, Estonian, Finnish, French, German, Greek, Hungarian, Italian, Latvian, Lithuanian, Norwegian, Polish, Portuguese, Russian, Slovak, Slovenian, Spanish, Swedish, Turkish, Korean, Simplified Chinese, and Traditional Chinese. These products are packaged in various formats designed for both online and offline delivery.

Innovation enables us to use basic tools to create complex outputs.

Our multimedia teams go through formal trainings, mentoring, apprenticeship, and other learning strategies to build their competencies from using the basic tools to innovating using a combination of applications.

With experienced and highly innovative artists and engineers, RenditionDigital uses commercial authoring and design applications in various platforms.

We master each application and innovate using a combination of tools.
